Subject: Re: Anatomy of a Case Webinar

Dear JLCS Participants,

Last week's webinar gave us the first opportunity to respond to your interests in particular information. The webinar originated with a request in Reno to hear more about how other judges have addressed climate science in their cases.

We would like to continue learning how we may best serve your needs for information on climate science and litigation. We therefore developed an evaluation form that is a little more detailed than usual, so we can learn whether this webinar served your needs and how we can improve our service to you. We ask that you take a few minutes to respond to this evaluation and give us any feedback or perspective you may have to offer, at:

Thank you for taking your valuable time to participate in the Judicial Leaders in Climate Science program, including giving us feedback. If there is any way that we can help you further, please let us know. Look forward to connecting with you in July.

Be well,

Alf

Subject: Anatomy of a Case Webinar Materials

Thank you for participating in our *Anatomy of a Case* webinar, whether you were online yesterday or watching the webinar recording today! It was great to connect again, to keep building your cohort's capability as "Judicial Leaders in Climate Science." We hope this webinar helps develop your sense of how you and your colleagues may be called on to judge climate science.

I have attached a copy of the slides and a copy of each opinion we discussed.

You can review the webinar recording [here](#). (Passcode is [REDACTED]) Given that some of you talk during the webinar, we ask that you not forward this Zoom recording to others outside the Program. We encourage you to think about how these cases or the science in them might be relevant to issues in your state.

Let us know if you have any questions and we look forward to seeing you in our next online programs:

- **July 17:** Webinar on Extreme Heat and Public Health (available to all judges)
- **July 24:** Zoom Discussion on Action Planning (with the first cohort).

If you have interest in hearing about other issues on climate science, please let me know. In the meantime, we hope you enjoy the final weeks of spring!

Alf
