Hi Judge Brock. I hope all is well. It is hard to believe that it has already been three months since we were together in Woods Hole.

We wanted to reach out to see if you had given more thought to an educational event for Arkansas judges. You had suggested in September that you might be interested in something focused on complex litigation, and we could certainly help with that, but we also thought it might be interesting to focus an Arkansas event on the energy transition. I read that in addition to hydropower, there are now two big solar projects online in Arkansas – one in Searcy!

If that is of any interest, we could help you to identify experts on the science, technology, economics, and impacts of the clean energy transition and how these are arising in state law. If you would like to discuss this or any other ideas, let us know, and we can set up a time to talk at your convenience.

Until then, please send my regards to [REDACTED], and I hope you have a great holiday season and a happy new year.

Best,  
Helene

Happy New Year, Judicial Leaders! I hope that you are all well. I am writing to let you know about some upcoming events that might be of interest.

Next week, on **Thursday, January 30, at noon Pacific/3 pm Eastern**, the National Judicial College, in collaboration with CJP, is holding a webinar on **Climate Change & Water: Droughts**. Dr. Benjamin I. Cook, a leading drought scientist at NASA's Goddard Institute for Space Studies and Columbia University, will share his expertise on the challenges that climate change poses for water availability. Cohort Two Judge Jennifer Valencia of the Second District Court of Utah and chair of Utah's water judge program will be moderating the webinar. You can click [here](#) to register.

Last June, we alerted you to the Environmental Law Institute's monthly briefing on climate change. The [next one](#) will be on **February 11 from 2-2:30 pm Eastern**. You will be automatically registered through our education department so that you receive a monthly notice about these briefings and so that if there is a fee to attend, it will be waived. If you do not want to receive information about these briefings, please reach out to CJP Manager, Jared Mummert (cc'd here).

Looking further ahead, we will be back in touch with a spring date for both cohorts to meet virtually to reconnect and share updates about your educational activities. And, as always, if you need any help or suggestions with respect to educational events about climate science, impacts and solutions, please do not hesitate to reach out to me or any of the CJP team.

Thanks, and I hope you all have a nice weekend,  
Helene

Thank you for registering to join **TOMORROW's** virtual ELI event, **Monthly Climate Change Briefing: February 2025!** Please review the details below before the event.

- **WHEN:**
  - **Tuesday, February 11, 2025**
  - The webinar will begin at **2:00 PM Eastern, 1:00 PM Central, 12:00 Noon Mountain, and 11:00 AM Pacific.**
  - Event run time is **30 minutes.**
- **WEBINAR DETAILS:**
  - Access the event description, list of speakers, and list of topics to be discussed via the [event page](#).
  - **To gain access to the webinar, go to <https://us02web.zoom.us/j/83584862661> just before the webinar start time.** If clicking the link does not work, try copy/pasting the URL into your browser.
  - Please note: To join Zoom, you may have to download Zoom software. Sound and video will be through your computer.
- **TECHNICAL PROBLEMS:**
  - **All questions regarding webinar technical issues or questions for the panelists** may be submitted via the Zoom interface that will be available during the event.
  - If you experience difficulty joining the event via Zoom, please reply directly to this message for assistance.
- **ADDITIONAL INFORMATION:**
  - This event **will be recorded** and made available **exclusively to ELI members** via the [event page](#) within 1-3 business days after the live event.
  - See a list of [all upcoming ELI events](#).
  - Visit [ELI's Events Archive](#) for webinar recordings exclusively available to ELI members.
  - Not a member? [Check out all the benefits of ELI membership!](#)

## JOIN THE WEBINAR

Looking forward to seeing you soon,

The ELI Education Team

Dear Judicial Leaders in Climate Science,

I hope you are well! I am excited to share two recent additions to our written curriculum on Climate Science and Law. First, we published a [new module on sea-level rise](#), co-authored by Professor Anna Ruth Halberstadt (UT-Austin Geosciences) and Professor Mark Nevitt (Emory Law School). This module integrates the fundamentals of sea-level science in Part I, and explores the various ways in which sea-level rise is affecting issues brought before the courts in Part II. If you are in a coastal jurisdiction, or if you are just curious and want to learn more about sea-level rise, I hope you will consider reading this.

Secondly, you might recall that the topic of detection and attribution was of high interest to both JLCS cohorts. To keep judges abreast of the latest science in this fast-moving field, we published a [brief supplemental paper](#) to our existing module, which describes recent developments in attribution science and how the science is informing litigation and state legislative action.

Finally, I wanted to remind you of ELI's free monthly climate change briefings, which feature remarks by leading experts on recent climate law and policy developments. This month's briefing is happening **next Tuesday, March 11 from 2-2:30 pm ET**. You can read more and register for the briefing [here](#). I hope you can make it!

And, as always, feel free to reach out to anyone on the team if we can be of help for any events or programs.

Best wishes,  
John
