Hi Peter,

Yes! Please feel free to pass any of these modules on to your colleagues! Currently available are the white papers, however we plan to add video content over time. We're planning to launch a more comprehensive resource website for all this curriculum content later this spring and will keep you apprised when that is available.

All the best,

Jarryd

CAUTION: This email originated from outside of the organization.

Aloha Jarryd,

What a fantastic idea. I look forward to watching the modules.

Do we have your permission to pass these on to other judges?

Peter

You don't often get email from ████████████████   Learn why this is important

Dear Judicial Leaders,

I hope your 2023 is off to a great start! Thanks so much for sending us your action plans; we're excited to see the directions you are going.

We're also excited to let you know that you can now find the majority of teaching modules for the Climate Judiciary Project curriculum at our website, https://www.eli.org/climate-judiciary-project. Once there, click the drop-down arrow next to "Climate Science and Law for Judges Curriculum" to find materials on the following topics:

- How Climate Science Works
- What is Causing Climate Change?
- Impacts of Climate Change
- Climate Justice (coming soon)
- Risks and Costs of Climate Change
- Drawing the Causal Chain: The Detection and Attribution of Climate Change (coming soon)
- Solving the Climate Change Problem (coming soon)
- Overview of Climate Litigation
- Applying Attribution: Impacts of Climate Attribution Science on Tort Litigation
- Government Action and Climate Science
- Fundamental Rights
- Procedural Techniques Available for Climate Litigation
- Judicial Remedies for Climate Disruption (coming soon)

These modules are designed and written specifically with judges in mind, so we hope you will explore them, and more importantly that you will find them useful! We very much would appreciate any feedback about

which modules you and your colleagues are most interested in. We'll be following up with you individually to see about additional dissemination and educational opportunities surrounding the curriculum.

Keep up the great work!

All the best,

Jarryd
