CAUTION: This email originated from outside of the Texas Judicial Branch email system. DO NOT click links or open attachments unless you expect them from the sender and know the content is safe.

That sounds like a success. Were there materials? If so, can you share. I never want to have to reinvent if a format and materials are already developed.

Thanks for the update.

Judge Linda R. Warner
Meigs Common Pleas Court

Congrats to Sam for the Spring presentation in Indiana! Sounds like it was a great and informative event with a great set of panelists. We hope to continue the efforts in educating our judiciary through presentations like these in the future! Wishing you the best from the Land of Enchantment, Mannie.

Good evening, Climate Science Colleagues: I hope/trust all are well & enjoying springtime in your respective quarters. These last ~10 days have seen a spate of absolutely beautiful weather here in northern IN. A quick update:

Thank you, John, for the below invitation to the new resource website: I'm registered & "verified" and look forward to using this new platform.

Indiana's judiciary held its annual spring conference last month in Indianapolis, which included a morning session (3 hours) on an introduction to climate science and the Hoosier State. Here's a big THANK YOU to Sandy Thiam, Charlie Cunningham, Jarryd Page & John Doherty for making that program happen & be the success it was. We presented in a panel format, consisting of Sandy, Charlie, Purdue University's Dr. Matthew Huber (Professor of Earth, Atmospheric and Planetary science), Indiana Judge James Joven (who presides over an environmental docket) and me. After some brief introductions, Sandy presented on national & regional trends on climate science/law, followed by Dr. Huber's stellar presentation on climate science, our changing climate and its global, regional & local impacts. Charlie & Judge Joven & I chimed in throughout to provide judicial context—but it was Sandy and Dr. Huber who carried the day. Our audience was interested, engaged and readily participated throughout. I believe the topic was well-received and an appetite exists for future climate-related sessions. Sandy & Jarryd & John were invaluable in recruiting Dr. Huber's assistance (as well as other local experts/academics). Special thanks also go to Sandy and Charlie for traveling some distance to get here to educate our IN judges.

My hope/intention is to engage our judicial education committee to continue with a series of climate-related programming. Last month's session was a good ground-breaker; it's the first time in recent memory (going back to at least ~2007) that a climate topic was presented to our IN judges.

I'll continue to update from here. Thanks, all! --Sam Scheele

Dear Judicial Leaders in Climate Science,

We are so pleased to announce that the Climate Judiciary Project has launched a new [resource website](#) for judges, where judges may go to access our curriculum materials, sign up for events, and learn about other scientifically credible sources of climate information. This effort arose from the growing judicial demand for these types of resources, and the website is uniquely designed for judges to learn about the various climate topics that might be relevant to them. We'll be sharing this website with our larger judicial and academic networks soon, but we wanted to give you all a "sneak peek" at it first. To obtain full access to all of the resources on the website, we are asking that judges register and select the option to be a "Verified Member" by checking the box when you do:

Verified Member

I would like to be a verified member for full access to CJP resources, news, and events.

Judges who have requested verification will gain access to additional resources, typically within one to two business days

This will enable you to view exclusive items on the website that are intended for judges only, such as registration for our judicial education programs. When you explore the website, it would be very beneficial for us to hear any feedback that you might have about it. We are looking forward to taking this exciting next step in the Project with you. Without your support and participation, this project wouldn't be possible. We are greatly appreciative for each of your efforts and assistance. Don't hesitate to reach out if you're having any trouble registering.

Thank you,

John

John M. Doherty, Ph.D.

Science Fellow, Climate Judiciary Project
