Hi Hyacinth et al -- I appreciate your efforts to save me time in working up a bio, but I think something along the lines of what I have set out below would be better and more relevant than what you currently have in the program. If it is possible to substitute this for what is in the program, that would be great. Please note that I would also prefer to have my current title in the agenda (rather than "Former President"). If replacing what is in the program is difficult at this stage, then at least please encourage whoever is introducing me to work from the Bio below. If you need something shorter, feel free to drop the last sentence. Thanks, Scott Fulton

Scott Fulton, President Emeritus and International Envoy, Environment Law Institute — Washington D.C.

Scott Fulton is President Emeritus and International Envoy for the Environment Law Institute (ELI), a leading non-nonprofit focused on building effective governance systems and rule of law in the environmental arena. From 2015-22, he served as ELI's President. Fulton spent over thirty years in United States government service between the Department of Justice, where he handled and oversaw major prosecutions, and the Environmental Protection Agency (EPA), where he served in a broad array of senior leadership positions, including chief operating officer, top lawyer, senior-most diplomat, head of enforcement, and Environmental Appeals Board judge, leaving a lasting imprint on EPA's organization design and policy architecture. During his nine years as an appeals judge, Fulton became deeply involved in the United Nations Environment Program's Global Judges Programme, working with UNEP to build the capacity of judges around the world for environmental casework — work in which Fulton has remained involved through collaboration with UNEP, the Global Judicial Institute on the Environment, and others. Fulton serves on the boards of several nonprofit organizations and is also affiliated with the consultancy, Sustainability Frameworks, LLP, assisting governments, businesses, and other stakeholders in meeting their sustainability goals. After leaving government and before taking the helm at ELI, Fulton was a partner at the world's premier environmental law firm, Beveridge & Diamond, P.C.
