Hello Jarryd,

I am, and I hope you're enjoying your holiday season as well!

Thank you for reaching out. The previous climate science program was very well-received, and the Philip Merrill Center was a wonderful venue. The judges currently serving as members of the Judicial Council's Education Committee determine which courses are included in the Judicial Education course catalog. The Committee has already finalized the offerings for 2026.

At this time, we plan to share the idea of a future climate-change program with a member of the Education Committee so they can consider it during planning for the 2027 course catalog. While we can't anticipate decisions the Committee may make, we will let you know if there are any updates or next steps.

Thank you again for your partnership on the last program. We appreciated the collaboration and would welcome opportunities to work together when feasible in the future.

Zipporah

Hi Zipporah,

I hope you're having a good fall! We wanted to reach out before the holidays to see whether

Maryland might be interested in another climate science program for judges in 2026, especially given how successful we thought the first one was! We've also seen increased interest from judges in learning about various aspects of energy and the energy transition, and we'd be happy to explore what a program on those topics might look like. Let us know what you're thinking, and whether you have some time in the coming weeks to discuss options.

Judge Knight and Judge Kehoe, just wanted to loop you in for your awareness, and I hope you are both doing well too!

Thanks, and look forward to connecting again.

All the best,

Jarryd
